IN THE CLAIMS

Claims 1-15 (canceled)

Claim 16. (Currently Amended)

A method of operating a security system comprising:

generating a plurality of video signals corresponding to a respective view from a plurality of cameras;

generating a security device signal with a security device,

when the security device signal is generated, automatically changing a display to a first video signal of the plurality of video signals in response to the security device signal, wherein the display comprises a touch screen; and

displaying an icon of the security device on the display corresponding to an ~~alaim~~ alarm state.

Claim 17. (Previously Presented)

A method as recited in claim 16 wherein the icon corresponds to a security device coverage area.

Claim 18. (Previously Presented)

A method as recited in claim 16 wherein the icon corresponds to a security device coverage volume.

Claim 19. (Previously Presented)

A method as recited in claim 16 further comprising when the security device signal is generated, generating an audible alarm.

Claim 20 (canceled)

Claim 21. (Currently Amended)

A method as recited in claim [[20]] 16 wherein in response to touching an icon on the touch screen, directing movement of the display.

Claim 22. (Previously Presented)

A method as recited in claim 16 wherein the display comprises three-dimensional display.

Claim 23. (Previously Presented)

A method as recited in claim 16 wherein the icon represents a field of view of coverage of the security device.

Claim 24. (Previously Presented)

A method as recited in claim 16 wherein the icon is translucent.

Claim 25. (Previously Presented)

A method as recited in claim 16 wherein the display comprises a two-dimensional display.

Claim 26. (Previously Presented)

A method as recited in claim 16 wherein the display comprises a three-dimensional display and a two-dimensional display.

Claim 27. (Previously Presented)

A method as recited in claim 26 wherein the icon comprises a two-dimensional icon displayed on the two-dimensional display and a three-dimensional icon displayed on the three-dimensional display.

Claim 28. (Previously Presented)

A method as recited in claim 16 wherein the display comprises a three-dimensional display and a two-dimensional display on separate screens.

Claim 29. (Previously Presented)

A method as recited in claim 16 wherein displaying an icon on the display corresponding to an alarm state comprises displaying the icon on the display corresponding to the alarm state by changing a color of the icon.

Claim 30. (Currently Amended)

A method as recited in claim 16 wherein displaying an icon on the display corresponding to an ~~alai n~~ <u>alarm</u> state comprises displaying the icon on the display corresponding to the alarm state by changing a material property of the icon.

Claim 31. (Previously Presented)

A method as recited in claim 16 wherein displaying an icon on the display corresponding to an alarm state comprises displaying the icon on the display corresponding to the alarm state by changing an animation of the icon.

Claim 32. (Previously Presented)

A method as recited in claim 16 further comprising displaying an ongoing alarm with the icon.

Claim 33. (Previously Presented)

A method as recited in claim 16 further comprising displaying an alarm priority with the icon.

Claim 34. (Previously Presented)

A method as recited in claim 16 further comprising displaying a past alarm with the icon.

Claim 35. (Previously Presented)

A method as recited in claim 16 further comprising displaying a tamper status with the icon.

Claim 36. (Previously Presented)

A method as recited in claim 16 further comprising displaying a disconnected state of a security device with the icon.

Claim 37. (Previously Presented)

A method as recited in claim 16 further comprising displaying an acknowledged state with the icon.

Claim 38. (Previously Presented)

A method as recited in claim 16 wherein automatically changing a display to a video signal corresponding to the video device comprises flying in a predetermined manner to a predetermined view of the security device.

Claim 39. (Previously Presented)

A method as recited in claim 16 further comprises generating audio cues.

Claim 40. (Currently Amended)

A method as recited in claim 39 wherein the audio cues [[arc]] are unique to each security device.

Claim 41. (Previously Presented)

A method as recited in claim 39 wherein the audio cues comprise a human voice declaring a location.

Claim 42. (Previously Presented)

A method as recited in claim 16 further comprising automatically sending hardware commands to other devices in response to the alarm signal.

Claim 43. (Previously Presented)

A method as recited in claim 16 wherein the other devices may comprise a digital video recorder.

Claims 44-70. (canceled)

Claim 71. (Currently Amended)

A method of operating a security system comprising:

generating a three-dimensional display of an area having a plurality of security devices;

displaying icons of the plurality of security devices on the display, wherein each icon corresponds to a three-dimensional field of view of coverage of the security device, wherein said display comprises a touch screen.

Claims 72-99. (canceled)
